EXAMINER'S COMMENT & EXAMINER'S AMENDMENT

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a method of processing an edge of a substrate, classified in class 134, subclass 21.
 - II. Claims 10-20, drawn to a system for processing an edge of a substrate, classified in class 134, subclass 95.2.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another apparatus such as one without a plurality of ports opening into the concave portion.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1746

6. During a telephone conversation between Examiner El-Arini and George Leavell on 9/20/05 a provisional election was made without traverse to prosecute the invention of Group II, claims 10-20. Claims 1-9 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiner's Amendment

8. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

9. The application has been amended as follows:

Cancel claims 1-9.

Allowable Subject Matter

10. The following is an examiner's statement of reasons for allowance: The closest prior art of record, U.S. Patent No. 6,575,177 to BROWN *et al.* & U.S. Patent No.

Art Unit: 1746

6,523,553 to REDEKER *et al.*, fail to teach or reasonably suggest each and every limitation of the instant invention. Specifically, BROWN *et al.* discloses a wafer cleaning system comprising an edge roller with vacuum port for removing cleaning fluid.

REDEKER *et al.* discloses a wafer cleaning system comprising edge rollers and a concave cleaning portion with a fluid feed port and removal (suction) port. However, neither reference teaches or reasonably suggests a system having an edge roller and proximity head mounted on the roller, the head having a concave portion with at least one of each a process liquid injection port, vacuum port, and surface tension control port. For at least the foregoing reasons, claims 10-20 are believed to recite patentable subject matter.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

12. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: U.S. Patent No. 6,797,074 to REDEKER *et al.*, which is

Art Unit: 1746

substantially cumulative to REDEKER cited above; U.S. Patent No. 5,861,066 to MOINPOUR *et al.*, which discloses applying cleaning fluid to an edge roller to clean a wafer edge; & U.S. Patent No. 4,968,375 to SATO *et al.*, which discloses applying fluid to an edge roller to treat a wafer edge.
